

TFS Compost Toilet Cabin

Both large capacity waste containers are removable and are sealable for during transit, with the 7.5 Litre Solids container featuring a secure lid and carry handle and the 8 Litre Liquids container featuring a secure screw lid. Always remember that it is good practice to fit the solids container with a biodegradable liner (found online from Amazon, binliners.co.uk etc) before use and for the user to sprinkle a handful of sawdust, wood shavings, peat, or similar, to cover over their solids to suppress any strong odours after each use. This will help with keeping things dry and starting the composting process. Regular checks of the content level are recommended to ensure the solids container does not become over full, likewise regular checks of the liquid's container is advised so that they do not become overfull. Tip: Use fresh pine sawdust or dry pine needles for a pine fresh smell, these products are available to purchase online from various retailers. Please Note: Always follow instructions carefully regarding product care and safe disposal of waste.
