

TFS Compost Toilet Cabin

Both large capacity waste containers are removable and are sealable for during transit, with the 7.5 litre Solids container, featuring a secure lid and a carry handle alongside the 8 litre liquids container, also featuring a secure screw lid.

Always remember it is good practice to fit the solids container with a bio degradable liner (found on amazon, or binliners.co.uk) before use and for the user to sprinkle a handful of sawdust, wood shavings, peat or similar to cover their solids, this will suppress any strong odours after each use, This will also help keep things “dry” and start the composting process quickly.

Regular checks of the content level are always recommended, to ensure the solid container does not become “overfull” Likewise with the liquid’s container. TIP: Use fresh dry pine needles for a pine fresh smell, also available from online retailers. Always follow guidelines carefully for product care and safe disposal of waste.

Material of Compost Toilet: Heavy Duty Polyethylene (recyclable)

Open Dimensions: (HxWxD) 42 x 32 x 52

MONDO COMPOST UNIT DIMENSIONS: (HxWxD) 2.31m x 1.19m x 1.22m

Weight 78 kgs

OPTIONAL EXTRAS:
