

## DELUXE TFS EXECUTIVE PORTABLE TOILET

The Deluxe Executive portable toilet is a chemical toilet, that can also work on a fresh water flushing option. The spacious design with maximum ventilation, anti-slip floor surface internal wash station & much more.....This is a top end toilet!

This unit requires no electricity to function and can easily convert to a conventional chemical toilet for large events. All chemical toilets require pumping out once full by a wet waste disposal expert. These units still require chemical for the breakdown of waste, even when being used as a fresh water flush.

Both the flushing system and the hand wash sink are operated by easy to use foot pump systems, which allow hands free / germ free operation. There is a fresh water tank fully integrated in the base of the unit, most of all, each component is designed to form a beautifully contoured interior, the units require topping up with fresh water if being used on a fresh water flush basis, this is accessed by the sink cavity.
